# Description

**The Akyga® AK-SC-E01 wall mount** is a practical addition to the electric car charging kit with **Type 2 (IEC62169-2) connector**. The accessory will not only help to keep things **tidy next to the parking space**, but it will also make putting a rubber cover on the connector unnecessary. Not every wallbox has a **hanger** that allows you to hang the plug after the vehicle has finished charging. Therefore, it is worth equipping yourself with a handy holder, which can be attached anywhere next to the charger. What's more, the holder has a **safety feature** that prevents the plug from being unplugged unintentionally. The **built-in latch** releases with the push of a button, so holding the plug in the holder protects it from accidental impact and damage, so it will last longer.
