Description

The Akyga® AK-SC-33 service cable is used to replace a damaged cable in **MacBook Pro** laptop power supply. It is a high quality **1.2 m long cable**, which has special **wires without termination**. They will allow for easy and quick installation of the cable in the power supply. On the other side there is a **magnetic MagSafe 2 connector**, which, like the original version, easily detaches when hooked up. What's more, the cable is equipped with a **practical velcro**, which is designed to facilitate the correct retraction of the cable when you are not using it. Thanks to this cable will serve us much longer.
