| Warranty | Yes |

# Description

**Akyga® AK-NC-32T** is a mobile **cabinet for tablets and laptops**. It will allow trouble-free, easy and also safe loading and transport of equipment. Thanks to the well-thought-out design, it is ideal for offices, schools and universities. Inside the charging cart, there are special **compartments for 32 tablets or iPads** with a maximum size of 11'' and a **shelf for two laptops**. In addition, there are **34 electrical sockets** next to them, which will allow you to connect the chargers for each device separately. In this way, all tablets stored in the cabinet can be charged simultaneously.
The cabinet was made of stainless steel. This material guarantees durability and aesthetic appearance for many years. The additionally reinforced side walls have **ventilation holes**. They serve to maintain optimal air flow and thus appropriate conditions for the work of power supplies. Furthermore, on the sides of the cart, two **carrying handles** and a **hanger for the power cable** have been attached. These make it easy to transport the office cart when required. In addition, there is a **set of castors** at the bottom of the cabinet. These will provide protection against excessive shocks when transporting the equipment. To ensure the safety of stored tablets and laptops, a **lockable door** has been placed at the front of the cart. This allows the mobile cabinet to store equipment in places where many people have access.
For greater comfort and safety, a **surge protector** has been fitted to the rear of the cabinet. It allows you to quickly switch on or off the power for all devices.
**The product is available on request. Delivery time is approximately 14 days.**
