Mining frame
Model: **AKM122**

Product code	AKM122
Product type	Mining frame
Motherboard compatibility	ATX
Drive bays 2.5"	1 pc
Riser shelf	Yes
Fan module	Yes
Number of GPU stands	12 pcs
Number of power supply stations	3 pcs
Sheet thickness	1 - 2 mm
Installed fans	None
Fan size	12 cm
Spaces for additional fans	12 pcs
Power supply unit included	None
Material	Galvanized steel
Product color	Black
Product size (L x W x H)	840 x 465 x 270 mm
Package size (L x W x H)	855 x 480 x 290 mm
Net weight	9,9 kg
Gross weight	10,8 kg
CE compatibility	Yes
Included accessories	Allen screws, button I/O
EAN code	5901720137630
Warranty	24 months

Description

The Akyga® AKM122 cryptocurrency miner case is the ideal solution for building advanced cryptocurrency miners as well as building a small server room. It presents a new approach to the construction of rigs for cryptocurrency miners. Thanks to its well-thought-out design, the case will perfectly cope with high temperatures. The **closed walls** make the airflow more targeted. This, in turn, increases the efficiency of the fans when conveying hot air to the outside of the case. This reduces the risk of overheating damage to the graphics cards and increases the performance.
The large, **close construction** is characterised by high rigidity. Robust **steel walls** make the case even more durable. The top cover can be easily removed for component installation or revision. Simply unscrew the screws to reveal the spacious interior of the rack. In the middle we can find two **crossbars for the mounting of risers** and a **profile for the installation of 12 graphics cards (GPU)**. In the lower part of the case there are special **mounting bolts for a motherboard**. This ensures that the mainboard is protected against damage by accidentally poking the case. Right next to it, there are holes for screwing in **up to 3 ATX power supplies**. Screws prevent the ATX power supplies from sliding around. On both sides of the case, the front and the back side, provide space for the fans installation. Thus, **up to 12 fans** with the size of 12 x 12cm can be installed, which ensure an **effective air circulation** inside the case.
PC components and the mounting screws are not included.
