Description

The Akyga AK-SC-E08 adapter is used to convert a Type 2 connector to Type 1. On one side of the adapter is a standard **Type 2 socket**, which fits most EV chargers found at public charging stations in Europe. At the other end, there is a **Type 1 plug**, which can be used to charge an EV with the J1772 socket, which is found on older cars and those imported from overseas. What is more, the adapter is made of high-quality materials that guarantee its long service life and trouble-free operation.
