Description

The **Akyga® AK-EV-08** is a high quality **universal charger for electric vehicles**. It will prove to be a power source for both **e-bikes** and **electric scooters**. The device has a popular **IEC C8** power socket on one side and an **endless cable** on the other, allowing you to **choose the plug freely** depending on the device being charged. Its maximum charging power is **60 W**, with output parameters of **29.4 V/2 A**. It is recommended to use it for charging vehicles equipped with a 24 V (7s) cell pack. Its greatest advantage is its high efficiency and reliability. It is equipped with an LED light that signals the duration or completion of the charging process.
The length of the charger cable is **1 meter**, which ensures use. The device is in black, packed in a pro-ecological **Ecobox**.
Warning! The power supplies are only intended for people with appropriate qualifications. Improper use may result in the risk of fatal electric shock.
