| Warranty                         | 24 months           |

## Description

LCD panel Akyga® AK-CA-24 designed for installation in 5.25" bays. Equipped with an LCD screen, two fans speed controllers and two USB 3.0 ports, it is a great accessory for every computer case.

By two separate channels, it allows manual or automatic smooth adjustment of the rotation speed of one or two fans in the range from 5 to 100%. Manual speed control mode allows advanced users to have full control over the cooling intensity of computer components and adapt it to current needs. The LCD display shows the current speed and temperature for each fan separately.

USB 3.0 ports are suitable for fast file transfer and device charging, as well as for connecting peripheral devices such as a mouse or keyboard. The 30 cm long cable allows free wires arrangement inside the housing.
