## Description

Adapter Akyga® AK-CA-33 converting the PCI-Express power connector to the **EPS 8-pin** connector of the motherboard (CPU power).

The cable is handy when the computer power supply does not have the required motherboard connector and at the same time is equipped with a **PCI-Express** power connector (6-pin or 8-pin). The adapter allows powering **motherboards and next-generation CPUs**, for which the power supply equipped with the classic P4 (4-pin) power supply connector can not be used.
