# Description

**The Akyga® AK-AD-71 headphone adapter** is a practical solution for those using phones with a USB-C port. It allows you to split the USB Type-C port on the smartphone into two separate ones – one **USB-C socket** and one **mini Jack port**. This enables simultaneous device charging and music listening.
A key feature of the **USB-C / Jack adapter** is the built-in **DAC converter**, which is essential for proper functioning with smartphones from brands like Samsung, HTC, and Huawei. In addition, the transducer allows the use of an integrated microphone with headphones, so that conversations are also possible.
Furthermore, the Akyga® AK-AD-71 adapter boasts compact dimensions, making it extremely practical and easy to always carry with you – whether in a purse, backpack, or pocket. Its light weight and ergonomic design ensure it's barely felt when worn, and using it is sheer pleasure.
