Description

The Akyga® AK-PD-23 shaver charger is a key component for ensuring the continuous operation of your shaver, ideal in case of damage or loss of the original power supply. It is specifically designed to work with **Braun Series 7 shavers**, ensuring perfect fit and reliable performance.
This charger is characterized by an **output voltage of 12 V** and a **power of 4.8 W**, thus providing optimal charging conditions for your shaver. These parameters are perfectly suited to the electrical needs of the Braun Series 7 shavers, allowing for safe and fast charging of the device without the risk of damaging the battery or shaver.
An additional advantage is the **cable length of 1.8 metres**. This allows for great freedom during charging, allowing the user to move freely and comfortably use the shaver even while charging. The long cable is particularly useful in bathrooms, where electrical outlets often are located in less accessible places.
