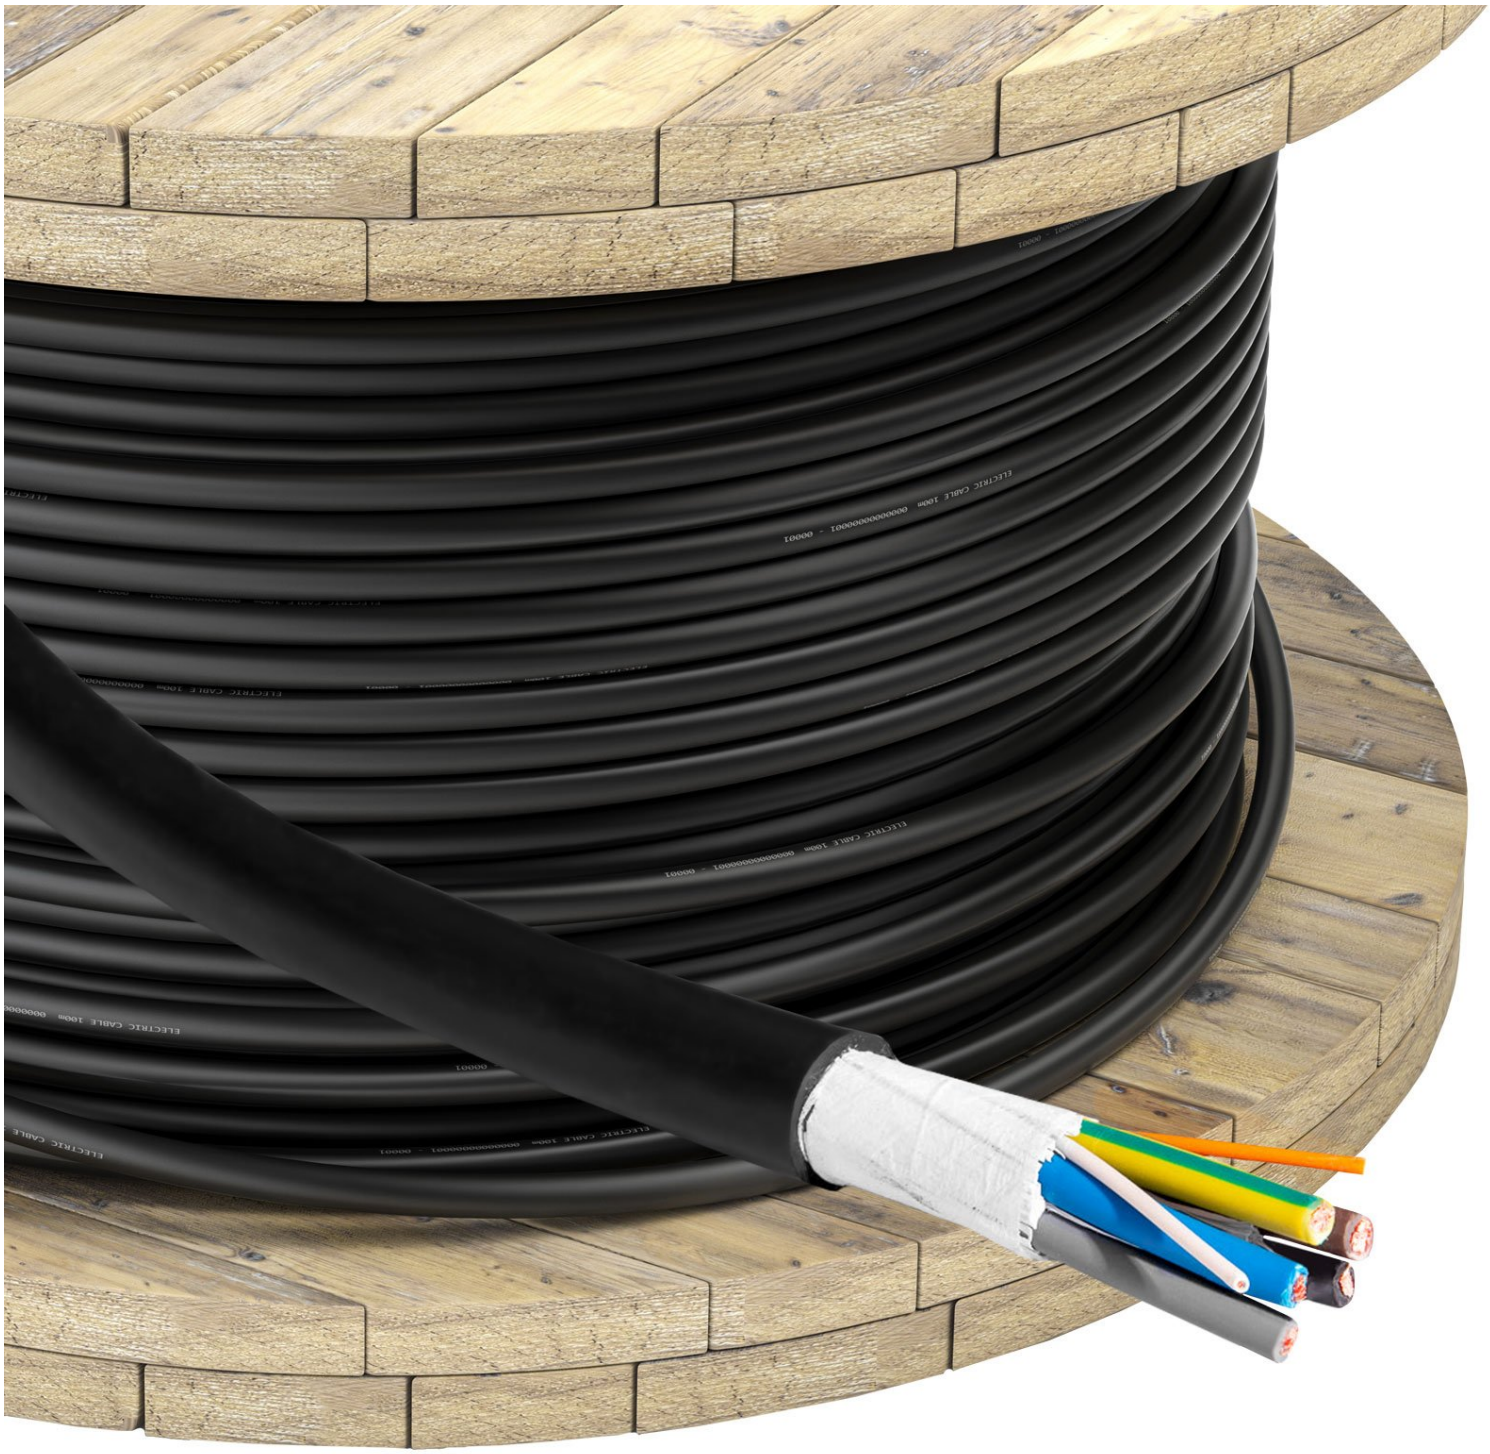
Electric Car Accessory

Model: **AK-SC-E12**



Product code	AK-SC-E12
Product type	Electric Car Accessory
Supply voltage	AC: 450 / 750 V
Number of phases	3 phase
Flame resistance	UL94V-0
Cable material	Copper
Wire gauge	5G6mm2 + 2x0.5 mm2
Isolation material	TPE
Product color	Black
Temperature	-40 / +125 °C
CE compatibility	Yes
RoHS compatibility	Yes
REACH compatibility	Yes
EAN code	5901720139207
Warranty	24 months

Description

Akyga® AK-SC-E12 is a specially designed **EV cable for charging electric cars** and motorbikes. It is made of high-quality materials like copper and non-toxic TPE. Thanks to this, the EV cable is durable and friction-resistant, which ensures efficient charging of the vehicle. What's more, the cable has **7 conductors**, including **2 communication conductors** that allow the necessary communication between the vehicle and the power station. This is important to ensure safe and efficient charging.
The AK-SC-E12 cable is available **by the metre**, making it versatile and compatible with different electric vehicle charging standards. Thanks to this flexibility, connectors tailored to the specific make and model of electric vehicle can be attached. This solution allows you to freely **adapt the length of the EV cable** to your individual needs. What's more, the EV cable is also ideal for replacing a damaged charging cable.
NOTE: The cable is sold by the metre. One piece is 1 m of cable. Goods are not returnable.
