Description

Akyga® AK-CA-43 is a front panel designed for mounting in computer cases as a service or replacement part. It consists of one **USB 3.0 port**, one **USB 2.0 port**, a headphone and a microphone inputs. USB 3.0 is a universal connector that guarantees up to ten times faster data transfer between a computer and external devices than in the 2.0 standard. The USB 2.0 port is perfect for connecting a wireless mouse, keyboard, external storage media or other peripheral devices. Audio inputs allow to connect speakers or microphone headphones. The panel works in accordance with the Audio HD system. The cable length of **65 cm** allows for easy connection and arrangement of cables inside the case. The panel is great as a replacement of broken parts, as well as in case of the need to replace port 2.0 on the standard 3.0 port. It is an ideal solution that can be used in Akyga Midi Tower enclosures.
